DETAILS

The Primus tankless toilet is the core of AXENT's complex and skillfully engineered technologies showcased in an exceptionally simple yet modern low-profile design. Its tankless design takes up less space than traditional toilets and incorporates engineering innovations to offer less design intrusion with more flushing excellence.

The Primus' applied "Venturi" system, named after the Italian physicist Giovanni Battista Venturi, paired with AXENT's Airless Siphon Technology, offer an exceptionally powerful flush without the need of a tank. This tankless design and powerful flushing efficiency leads to the Primus' one-of-a-kind water conservation benefits and eliminates the need for unnecessary ceramic (a reduction of more than 25% less materials than traditional toilets).
